## About

After several years of experience as a Full Stack Developer, I am seeking a new challenge. I am highly driven, approachable, and flexible towards colleagues and projects. I value collaboration and consultation, but at the same time, I can work independently and goal oriented.

In my free time, I enjoy exploring new technologies and working on personal projects. I am also passionate about sports, particularly cycling and visiting the gym, which help me stay active and energized.

## Education

### PXL University College

Hasselt

Bachelor's degree, Software Engineering, graduated with Great Distinction

Thesis: Research project on API Management and Security, focusing on building scalable and secure API's

## Certifications

- Introduction to OAuth 2.0 and OpenID Connect by Pragmatic Web Security

## Experience

### Cipal Schaubroeck

Geel (Hybrid)

#### Full-stack Developer

March 2022 – Present

- Led the implementation of a Single Logout (SLO) system, enabling secure logout for 80,000 users across multiple applications and external parties.
- Developed features for the identity and access management platform using Java, Spring, Angular, and Keycloak.
- Upheld security standards by implementing timely upgrades for key technologies.
- Maintained and optimized the Docker environment to ensure reliable product deployment.
- Responsible for the production state of the IAM platform, resolving issues promptly as they arose.
- Optimized and streamlined development environments to improve integration and support for developers utilizing the IAM platform.

### Heracles Westerlo

Westerlo

#### Co-Owner

July 2012 – March 2022

- Managed day-to-day operations during shifts, overseeing staff task assignments and coordinating efforts to ensure efficient workflow and customer service.
- Developed and managed the company website in React, optimizing it for SEO and mobile devices, which led to increased online presence and a higher volume of visitors.
- Administered and optimized the IT infrastructure and network.
